Overview

I Economy and Market Trends

1 Economic Overview

In 2023, the Japanese economy saw a gradual return to normalcy of economic and social activities after COVID-19 was re-classified in May as a Class 5 infectious disease under the Infectious Diseases Control Act. There were positive developments including the highest wage increases in 30 years during the annual spring labor offensive and strong appetite for corporate investment. However, the favorable business conditions and companies' profits were not fully channeled into wages and investment, and domestic demand was lacking in strength.

Looking at GDP trends, real GDP (quarter on quarter) grew by 1.2% in the first quarter (Q1) of 2023 and 0.9% in Q2 but turned negative at -1.0% in Q3. Although the figure for Q4 was 0.0%, the annual GDP reached a record high of ¥558 trillion. During the Q1, a balanced increase in private demand such as personal consumption and capital investment contributed to the real GDP growth. In the Q2, net exports considerably supported the growth, affected by the easing of semiconductor supply constraints and the recovery of inbound demand.

Corporate profits (ordinary profits) for fiscal year 2023 (ending March 2023) reached a record high, increasing 13.4% from ¥95.27 trillion to ¥108.10 trillion compared to the previous fiscal year thanks to the effects of weaker yen and the relaxed supply constraints.

The ratio of ordinary profits to sales increased by 1.2 percentage points from 6.0% to 7.2%.

Both the consumer and corporate price indexes rose in 2023. The consumer price index (excluding fresh food) increased by 3.1% year on year (YoY), the first-ever increase in 41 years, due to food price hike affected by rising transportation costs as well as service price increase reflecting higher raw material prices and recovery in demand. The corporate price index increased by 4.1% YoY, slowing down from the previous year, as the price change of wood and wood products and chemical products turned negative while the price increase in petroleum and coal products, electricity, city gas, and water narrowed.

Regarding the employment situation, the unemployment rate in 2023 was 2.6%, unchanged from the previous year. The job offers to seekers ratio rose to 1.31 from 1.28 in the previous year.

2 Stock Market

The Nikkei 225 Stock Average started 2023 at ¥25,716, but there was a temporary risk-off trend in March due to the bankruptcy of overseas financial institutions. On the other hand, in March, the Tokyo Stock Exchange requested the companies with a PBR below 1 to improve their capital efficiency. In May, normalization of economic and social activities became apparent

and led growing expectations for management reforms at Japanese companies. Accordingly, the Nikkei 225 rose above ¥33,000 in June. Since then, the index has generally fluctuated within a box range, and closed the year at ¥33,464, up ¥7,370 (28.2%) from the end of 2022.

After starting 2024 at ¥33,288, stock prices, particularly those related to semiconductor, rose due to the launch of the new NISA (described later), the weaker yen, and the US technology stocks rise, and the Nikkei 225 reached an all-time high of ¥40,888 on March 22.

In 2023, equity funding by public companies (paid-in capital increases) was ¥1,312.1 billion, up ¥844.9 billion from the previous year. The number of newly listed companies increased by 3 from the previous year to 131, and the amount of initial public offering increased by ¥40.0 billion YoY to ¥124.1 billion.

3 Bond Market

Long-term interest rate (simple yield of new 10-year JGBs) started the year at 0.465%. From January to early March, as upward pressure on interest rates intensified in anticipation of monetary policy changes, the rate occasionally exceeded the interest rate fluctuation range (approximately $\pm 0.5\%$) permitted by the Bank of Japan. At the July Monetary Policy Meeting, the Bank of Japan decided to "conduct yield curve control with greater flexibility," and while the fluctuation range of long-term interest rates was set at "approximately $\pm 0.5\%$ ", the level of strict control by consecutive fixed-rate purchase operations was raised from 0.5% to 1.0%. Then, in October, it was decided to "further increase the flexibility in the conduct of yield curve control." As a result, with the upper bound of long-term interest rates set at approximately 1.0%, the operation was changed to discontinue the strict control by fixed-rate purchase operations that had been conducted every business day until then. Furthermore, in March 2024, it was determined to lift the negative interest rate policy and end yield curve control. Since then, interest rates have generally remained around 1.0%.

The over-the-counter trading volume of public and corporate bonds increased 32.4% YoY to ¥45,278 trillion (of which ¥45,228 trillion was JGBs). The issuance amount of public and corporate bonds was ¥237 trillion.

4 Investment Trusts

The net assets amount of investment trusts at the end of 2023 were ¥325.67 trillion (+16.7% YoY). Its breakdown was, publicly offered investment trusts ¥196.90 trillion (+25.2% YoY), private placement investment trusts ¥113.36 trillion (+5.6% YoY), and real estate investment trusts ¥15.40 trillion (+6.5% YoY).

5 Derivative Market

The volume of market derivatives trading in 2023 was 376.43 million units (+0.2% YoY).

6 Investor Trends

The breakdown of stockholdings by investor type at the end of FY2023 was, foreigners accounted for 31.8% (+1.7% from the FY2022, same for the other figures), corporations 19.3% (-0.3%), individuals 16.9% (-0.7%), financial institutions 13.8 (-1.5%), and investment trusts 10.4% (+0.8%).

7 Household Financial Assets

As for the composition of household financial assets at the end of FY2023, stocks and other equities reached 14.2%, 2.8% increase from the previous fiscal year end. Others were as follows: Cash and deposits 50.9%; Investment trusts 5.4%; Bonds 1.3%; and Insurance and pension reserves 24.6%.

Regarding NISA (Nippon Individual Savings Account: tax exemption scheme for investment by individuals) introduced in 2014, the scheme has been greatly expanded since January 2014 as new NISA, and 23.22 million accounts had been opened as of the end of FY2023. The cumulative purchase amount since the start of the scheme was ¥41.43 trillion, an increase of ¥9.85 trillion from the end of FY2022.

II Securities Industry Overview

1 Number of Firms, Employees, etc.

As of the end of FY 2023, the number of regular members (securities firms that are members of the Japan Securities Dealers Association (JSDA)) was 272, with 3 enrollments and 4 withdrawals, etc. during the fiscal year. The number of special members (banks and other registered financial institutions that are members of the JSDA) was 200, down by 1 from the previous fiscal year.

The number of employees of regular members at FY 2023 end was 85,000, decreased from 86,000 at the previous FY end. The number of domestic offices of regular members continued to decrease to 1,974, down by 21 from the end of FY2022.

The number of registered sales representatives of member firms at FY 2023 end also continued to decrease to 461,000, down by 10,000 YoY.

By membership category, the number of sales representatives registered by regular members was 69,000 (down by 2,000 YoY), and the number of those registered by special members was 305,000 (down by 7,000 YoY). On the contrary, the number of sales representatives registered with financial instruments intermediary service providers that are on agency contract with regular members increased for 14 consecutive years.

2 Performance Summary

During FY 2023 the 261* domestic securities firms recorded ¥5,426.3 billion of total operating revenues, which showed 29.4% increase from the previous FY.

Among the revenue, Commissions counted ¥2,761.2 billion and Trading gains were ¥829.6 billion.

For the cost side, selling, general and administrative costs (SG&A) increased by 5.7% YoY to ¥3,200.4 billion. The SG&A includes ¥845.3 billion Transaction expenses and ¥1,112.2 billion Personnel expenses.

As a result, the industry achieved ordinary profits of ¥925.6 billion, an 86.9% increase from the previous year and a net income uptick by 99.7% to ¥667.9 billion YoY.

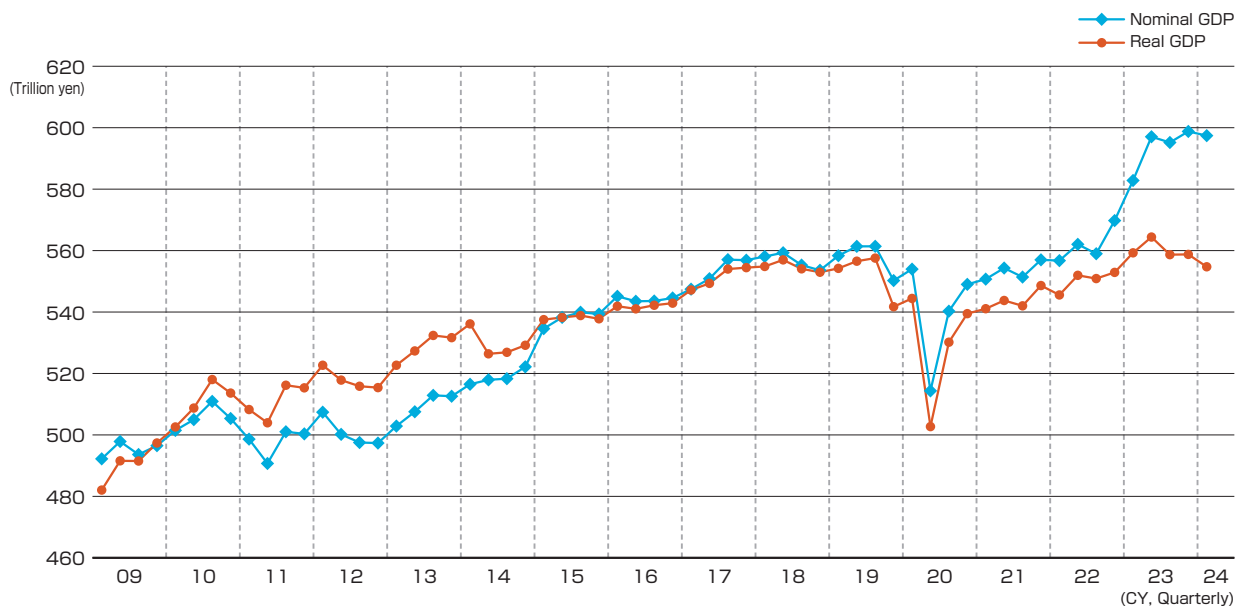

** For this summary, 10 companies that have closed their businesses are excluded from all the 271 securities companies registered as of the end of March 2024.*
