The authors regret two errors in Equation 3.8 and 3.11.

Equation 3.8 was originally specified as:

$$\pi_{ct} = s_{ct} p_{ct} + i_{bt-1}^d D_{ct-1} + (inv_{ct} uc_{ct} - inv_{ct-1} uc_{ct-1}) \dots - \sum_{n \in N_{ct}} \omega_{nt} - \sum_{j=t-\eta}^{t-1} i_{jL_{cj}}^t \frac{\eta - [(t-1) - j]}{\eta} - \sum_{k \in K_{ct-1}} (k^k p^k) \frac{1}{\kappa}$$

In the production phase the equation was edited to appear on a single line but the ‘...’ have not been removed and now appear in the middle of the equation. The correct equation should appear like this:

$$\pi_{ct} = s_{ct} p_{ct} + i_{bt-1}^d D_{ct-1} + (inv_{ct} uc_{ct} - inv_{ct-1} uc_{ct-1}) - \sum_{n \in N_{ct}} w_{nt} - \sum_{j=t-\eta}^{t-1} i_{jL_{cj}}^t \frac{\eta - [(t-1) - j]}{\eta} - \sum_{k \in K_{ct-1}} (k^k p^k) \frac{1}{\kappa}$$

Equation 3.11 contains a mistake as we forgot to include a term and the non-negative condition. In the published paper the equation appears as:

$$L_{ct}^D = I_{ct}^D + Div_{ct}^e + \sigma W_{ct}^e N_{ct}^D - OCF_{ct}^e$$

while it should be like this:

$$L_{ct}^D = \text{Max}\{I_{ct}^D + Div_{ct}^e + \sigma W_{ct}^e N_{ct}^D - OCF_{ct}^e - D_{ct}, 0\}$$
